Printed in EU The Paddock is published 12 times a year by Destination Grand Prix Ltd.

THE ART OF RACING

By **Francesca Thompson**

In his teens, **David Wiener** was one of the youngest professional photographers in America, shooting the exciting worlds of Formula 1, Indy, the America's Cup and the US Open. Over the years he became a world-renowned designer, working with Porsche Racing, Ferrari, Ganassi Racing and many others in Formula 1 and endurance. David is famous for his iconic Ferrari Art.Engine home audio system, Ferrari's most exclusive licensed product, so we at Paddock magazine decided to show our readers some of his new works.

The artist has added yet another medium to his broad spectrum of design and other creative works with his new fine art series, Photographic Constructs. This collection of museum-quality archival prints combines photography, design and technology in modern and abstract ways that are both intriguing and elegant. David's unique lens drives the viewer to see art in the often-overlooked details of technology, architecture, and nature.

David Wiener's fine art leaves you to imagine the origin of the subject, while capturing its beauty in a unique and creative way. David's creations are in the private collections of Jean Todt, Michael Schumacher, Kimi Räikkönen, Sanjay Dutt, Alan Parsons, Pat Metheny, Ferrari SpA, Ferrari NA and the Mandarin Oriental. Visit www.DavidWienerArt.com if you'd like to know more.
